- 240v Charge Points
- Gas Cooker
- Cooking Equipment
- Sink & 10L Container
- Food Storage

Electrical

Power Inverter & 240v Outlets

The fridge is powered via an inverter while the vehicle engine is running, drawing power from the main battery. This inverter also has 240v plug outlets for charging laptops & camera batteries!

To keep the fridge running overnight, you'll need to have access to a powered campsite. Most caravan parks offer these sites for a small additional fee.

About the Vehicle

Model: Toyota Estima or similar
